

30 November 2007: New logo for DanCopter.

Today DanCopter presents its new logo. A new logo has been desired by the Board since February this year.

The process with the new logo has been comprehensive and exiting and has comprised the use of an external company.

The new logo of DanCopter represents the basic values in the company: Danish values (such as our level of quality and safety), Credibility, Globalisation and Dynamic.

The process with replacing the logo has started and will continue into the coming months.
