

## **18.05.2006 Shell flight no. 500**

Friday 05.05.2006 at 16:30 DanCopter flew flight no. 500 for Shell from Den Helder.

The flight was performed by the captain Benno Rosenmeier and captain Jørgen Pedersen. Mechanic Kent Christensen had the helicopter prepared and ready for takeoff in time and with no delay – as usual.

The passengers were surprised and enthusiastic when managing director Susanne Lastein presented cakes as well as t-shirts to them before takeoff. The t-shirts were custom made with the DanCopter logo and the text; "Shell flight no. 500". The cakes were brought from Denmark by Susanne and Sussi for this occasion especially.

All the other employees at the airport who were involved in this flight also had cake and a t-shirt.

In order to celebrate this occasion Peterson presented a special made clock to DanCopter. The clock was received by Susanne.

It was a wonderful day in a sunny Den Helder airport.
