

06.06.2006 DanCopter A/S takes over the "leadership" in EHOC.

Managing director in DanCopter A/S, Susanne H. Lastein, took over the position as chairman of the European Helicopter Operators Committee (EHOC) as per 22.05.06. With this she will be the first female chairman since the start in 1969.

The EHOC organization consists of the 16 most important helicopter operators operating larger two-motor helicopters in Western Europe. The organization further has associated members in Canada, USA, and Africa.

The EHOC were established in 1969. At that time it was obvious that due to a continuously growing offshore transportation there was a need for a forum in which the operators could exchange their experience and discuss the development of a constant demanding and important helicopter service. Following the EHOC has built up a reputation as an important forum for handling the interests of the helicopter operators and the future business development.
